Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

1) embodiment 1, the first repairing pattern and the second repair pattern are not connected to the common line, Figs.2-3;

2) embodiment 2, the first repairing pattern and the second repair pattern are connected to the common line, Fig.4;

3) embodiment 3, the cutting region of the common line has a width smaller than other section of the common line and pixel electrode not covers the cutting region, Fig.5;

4) embodiment 4, two recess regions are formed in the pixel electrode and directly above the cutting region, Fig.6;

5) embodiment 5, a plurality of slits are formed in the pixel electrode, Fig.7;

6) embodiment 6, the common line beside the data line as a repair section and the cutting region between the second repair terminal and the section of the common line having a width smaller than other section of the common line and pixel electrode not covers the cutting region, Fig.8;

7) embodiment 7, one recess region is formed in the pixel electrode and directly above the cutting region, and the common line beside the data line as a repair section, Fig.9;

8) embodiment 8, a plurality of slits are formed in the pixel electrode, and the common line beside the data line as a repair section, Fig.10.

The species are independent or distinct because the different embodiments need different searches.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
